Product Highlights

This dual slot 8HP wide 6U high filtered ac-dc power supply converter card has a single output available from five possible factory configured output selections (+5Vdc, +12Vdc, +24Vdc, +28Vdc, or +48Vdc) with 400W, 600W or 650W available depending on the output voltage. This Military Mil-COTS power supply solution is designed to meet portions of Mil-Std-704F and Mil-Std-1399 input requirements, portions of MIL-STD-810F vibration and shock requirements and portions of the MIL-STD-461E EMI requirements. When compared to VME power supplies using conventional technology, this dual slot air cooled ac-dc power supply converter provides users with higher efficiency (83%), lower weight (4 lbs), and higher power (up to 650W).

AEGIS Power Systems, Inc. specializes in the front end design, development, and manufacture of Rapid Response Custom Switching Power Supplies for Mil-COTS, defense, industrial, telecomm, aircraft, shipboard, rack mount, and electric powered vehicle applications. Contact Aegis Power Systems for details on Mil-Specs that this product is designed to meet.
